- Guitar volume is adjustable by EXPRESSION CC#11

REPETITION

Playing repeated notes in rapid succession to get that fast up-down-up-down rhythm can be quite difficult to play with a keyboard. We have created a custom script that helps with this. If you play the notes above middle D on the keyboard, all these notes play the last note.

EXAMPLE:

Say you want E, E, E, E in rapid succession. Play the E in your left, then all notes above middle D will play that same note (E). Play a legato scale with your right hand and you will see that it has a great repetition effect that is quite realistic and not possible to accomplish otherwise.

LONGS AND SHORTS

- High velocities play the LONG notes.
- Low velocities play the SHORT notes.
